

Bulletin of the Seismological Society of America

Volume 105 • Number 1 • February 2015

Contents

ⓔ indicates that online material is available in the electronic edition of BSSA

Articles

- Holocene Paleearthquakes and Early–Late Pleistocene Slip Rate on the Sulmona Fault (Central Apennines, Italy) 1 ⓔ
Paolo Galli, Biagio Giaccio, Edoardo Peronace, and Paolo Messina
- Synchronous Ruptures along a Major Graben-Forming Fault System: Wasatch and West Valley Fault Zones, Utah 14
Christopher B. DuRoss and Michael D. Hylland
- Paleoseismic Evidence for Late Holocene Tectonic Deformation along the Saddle Mountain Fault Zone, Southeastern Olympic Peninsula, Washington 38
Elizabeth A. Barnett, Brian L. Sherrod, Jonathan F. Hughes, Harvey M. Kelsey, Jessica L. Czajkowski, Timothy J. Walsh, Trevor A. Contreras, Elizabeth R. Schermer, and Robert J. Carson
- Earthquake Geology of the Bulnay Fault (Mongolia) 72 ⓔ
M. Rizza, J.-F. Ritz, C. Prentice, R. Vassallo, R. Braucher, C. Larroque, A. Arzhannikova, S. Arzhannikov, S. Mahan, M. Massault, J.-L. Michelot, M. Todbileg, and ASTER Team
- Maximum-Likelihood Recurrence Parameters and Conditional Probability of a Ground-Rupturing Earthquake on the Southern Alpine Fault, South Island, New Zealand 94
Glenn P. Biasi, Robert M. Langridge, Kelvin R. Berryman, Kate J. Clark, and Ursula A. Cochran
- Prediction of Wave Propagation in Buildings Using Data from a Single Seismometer 107
Ming Hei Cheng, Monica D. Kohler, and Thomas H. Heaton
- Building Time-Dependent Earthquake Recurrence Models for Probabilistic Risk Computations 120
Delphine D. Fitzenz and Marleen Nyst
- Simulating Earthquake Rupture and Off-Fault Fracture Response: Application to the Safety Assessment of the Swedish Nuclear Waste Repository 134
Billy Fälth, Harald Hökmark, Björn Lund, Paul Martin Mai, Roland Roberts, and Raymond Munier
- Revised Tectonic Forecast of Global Shallow Seismicity Based on Version 2.1 of the Global Strain Rate Map 152 ⓔ
Peter Bird and Corné Kreemer
- A Long-Term Seismic Quiescence before the 2004 Sumatra (M_w 9.1) Earthquake 167
Kei Katsumata

Seismic Coupling of Chemical Explosions in Intact and Fractured Granite in Barre, Vermont <i>Anastasia Stroujkova, Mark Leidig, and Timothy Rath</i>	177
Earthquakes Induced by Hydraulic Fracturing in Poland Township, Ohio <i>Robert J. Skoumal, Michael R. Brudzinski, and Brian S. Currie</i>	189
Continued Geothermal Reservoir Stimulation Experiments in the Cooper Basin (Australia) <i>Stefan Baisch, Elmar Rothert, Henrik Stang, Robert Vörös, Christopher Koch, and Andrew McMahon</i>	198
Identification and Extraction of Surface Waves from Three-Component Seismograms Based on the Normalized Inner Product <i>Kristel C. Meza-Fajardo, Apostolos S. Papageorgiou, and Jean-François Semblat</i>	210
A Systematic Comparison of the Transverse Energy Minimization and Splitting Intensity Techniques for Measuring Shear-Wave Splitting Parameters <i>Fansheng Kong, Stephen S. Gao, and Kelly H. Liu</i>	230 (E)
Initial Global Seismic Cross-Correlation Results: Implications for Empirical Signal Detectors <i>D. A. Dodge and W. R. Walter</i>	240
A Robust Calibration Technique for Acoustic Emission Systems Based on Momentum Transfer from a Ball Drop <i>Gregory C. McLaskey, David A. Lockner, Brian D. Kilgore, and Nicholas M. Beeler</i>	257
Region-Specific Spatial Cross-Correlation Model for Stochastic Simulation of Regionalized Ground-Motion Time Histories <i>Duruo Huang and Gang Wang</i>	272
Analysis of Anthropogenic and Natural Noise from Multilevel Borehole Seismometers in an Urban Environment, Auckland, New Zealand <i>C. M. Boese, L. Wotherspoon, M. Alvarez, and P. Malin</i>	285 (E)
Removing Noise from the Vertical Component Records of Ocean-Bottom Seismometers: Results from Year One of the Cascadia Initiative <i>Samuel W. Bell, Donald W. Forsyth, and Youyi Ruan</i>	300
Relocations of Five Yingjiang Sequences (China–Myanmar Border): Details of Seismogenic Faults <i>Yan Xu, Dan-Ning Li, Yang Gao, and Jia-Bin He</i>	314
The 8 October 2011 Earthquake at El Hierro (M_w 4.0): Focal Mechanisms of the Mainshock and Its Foreshocks <i>Carmen del Fresno, Itahiza Domínguez Cerdeña, Simone Cesca, and Elisa Buforn</i>	330
Generation of Nonstationary Ground Motions Compatible with Multidamping Response Spectra <i>Yushan Zhang, Fengxin Zhao, and Caihong Yang</i>	341
Frequency-Scaled Curvature as a Proxy for Topographic Site-Effect Amplification and Ground-Motion Variability <i>Emeline Maufroy, Víctor M. Cruz-Atienza, Fabrice Cotton, and Stéphane Gaffet</i>	354
Scenario Source Models and Strong Ground Motion for Future Mega-earthquakes: Application to Lima, Central Peru <i>Nelson Pulido, Zenón Aguilar, Hernando Tavera, Mohamed Chlieh, Diana Calderón, Toru Sekiguchi, Shoichi Nakai, and Fumio Yamazaki</i>	368
Rupture Propagation and Ground Motion of Strike-Slip Stepovers with Intermediate Fault Segments <i>Julian C. Lozos, David D. Oglesby, James N. Brune, and Kim B. Olsen</i>	387

Near-Real-Time Ground-Motion Updating for Earthquake Shaking Prediction <i>Raffaella De Matteis and Vincenzo Convertito</i>	400
Continent-Wide Maps of L_g Coda Q for North America and Their Relationship to Crustal Structure and Evolution <i>Brian J. Mitchell, Lianli Cong, and Alemayehu L. Jemberie</i>	409
Spatial Variation of L_g -Wave Attenuation in the Iberian Peninsula <i>Raquel Noriega, Arantza Ugalde, Antonio Villaseñor, and M. José Jurado</i>	420 (E)
Coseismic Strains on Plate Boundary Observatory Borehole Strainmeters in Southern California <i>Andrew J. Barbour, Duncan Carr Agnew, and Frank K. Wyatt</i>	431 (E)
Erratum	
<i>Erratum to</i> Synthesis of Earthquake-Like Sound Using Seismic Ground-Motion Records Notice of Partially Redundant Publication <i>Takashi Hirai and Nobuo Fukuwa</i>	445
Comment and Reply	
Comment on “Models of Stochastic, Spatially Varying Stress in the Crust Compatible with Focal-Mechanism Data, and How Stress Inversions Can Be Biased toward the Stress Rate” by Deborah Elaine Smith and Thomas H. Heaton <i>Jeanne L. Hardebeck</i>	447
Reply to “Comment on ‘Models of Stochastic, Spatially Varying Stress in the Crust Compatible with Focal-Mechanism Data, and How Stress Inversions Can Be Biased toward the Stress Rate’ by Deborah Elaine Smith and Thomas H. Heaton” by Jeanne L. Hardebeck <i>Deborah Elaine Smith and Thomas H. Heaton</i>	452
Short Notes	
Time-Dependent Renewal-Model Probabilities When Date of Last Earthquake is Unknown <i>Edward H. Field and Thomas H. Jordan</i>	459
Annual Periodicity in the Seismicity and Water Levels of the Koyna and Warna Reservoirs, Western India: A Singular Spectrum Analysis <i>Amrita Yadav, Kalpna Gahalaut, K. Mallika, and N. Purnachandra Rao</i>	464
Shear-Wave Velocity Structure of the Koyna–Warna Region in Western India Using Ambient Noise Correlation and Surface-Wave Dispersion <i>Sunil Rohilla, N. Purnachandra Rao, Peter Gerstoft, D. Shashidhar, and H. V. S. Satyanarayana</i>	473
The Burst-Like Behavior of Aseismic Slip on a Rough Fault: The Creeping Section of the Haiyuan Fault, China <i>R. Jolivet, T. Candela, C. Lasserre, F. Renard, Y. Klinger, and M.-P. Doin</i>	480
Earthquake Activity in Northern Cascadia Subduction Zone Off Vancouver Island Revealed by Ocean-Bottom Seismograph Observations <i>Koichiro Obana, Martin Scherwath, Yojiro Yamamoto, Shuichi Kodaira, Kelin Wang, George Spence, Michael Riedel, and Honn Kao</i>	489
