

Bulletin of the Seismological Society of America

Volume 106 • Number 4 • August 2016

Contents

ⓔ indicates that online material is available in the electronic edition of BSSA

Articles

- Detection of the Wenchuan Aftershock Sequence Using Waveform Correlation with a Composite Regional Network 1371
Megan Slinkard, Stephen Heck, David Schaff, Nedra Bonal, David Daily, Christopher Young, and Paul Richards
- Hybrid Seismic Denoising Using Higher-Order Statistics and Improved Wavelet Block Thresholding 1380
S. Mostafa Mousavi and Charles A. Langston
- Imaging Shallow Crustal Structure in the Upper Mississippi Embayment Using Local Earthquake Waveform Data 1394 ⓔ
Shu-Chioung Chi Chiu, Charles A. Langston, Jer-Ming Chiu, and Mitch Withers
- The Attenuation of High-Frequency Seismic Waves in the Lower Siang Region of Arunachal Himalaya: Q_α , Q_β , Q_c , Q_i , and Q_s 1407
Rohtash Kumar, S. C. Gupta, S. P. Singh, and Arjun Kumar
- Local Earthquakes of the Mexico Basin in Mexico City: κ , Q , Source Spectra, and Stress Drop 1423
Javier Lermo, Miguel A. Santoyo, Miguel A. Jaimes, Yanet Antayhua, and Marcos Chavacán
- Near-Surface Velocity Structure of Pacaya Volcano, Guatemala, Derived from Small-Aperture Array Analysis of Seismic Tremor 1438 ⓔ
Federica Lanza, Lindsey M. Kenyon, and Gregory P. Waite
- Fault Geometry of the M_w 7.7 Western India Intraplate Earthquake: Constrained from Double-Difference Tomography and Fault-Plane Solutions 1446
A. P. Singh, Catherine Dorbath, M. Ravi Kumar, Santosh Kumar, Indu Chaudhary, and J. R. Kayal
- Seismic Imaging beneath an InSAR Anomaly in Eastern Washington State: Shallow Faulting Associated with an Earthquake Swarm in a Low-Hazard Area 1461
W. J. Stephenson, J. K. Odum, C. W. Wicks, T. L. Pratt, and R. J. Blakely
- The 11 October 2010 Novaya Zemlya Earthquake: Implications for Velocity Models and Regional Event Location 1470
S. J. Gibbons, G. Antonovskaya, V. Asming, Y. V. Konechnaya, E. Kremenetskaya, T. Kværna, J. Schweitzer, and N. V. Vaganova
- Estimation of the Coda-Wave Attenuation and Geometrical Spreading in the New Madrid Seismic Zone 1482
Farhad Sedaghati and Shahram Pezeshk

Depth-Dependent Crustal Scattering Attenuation Revealed Using Single or Few Events in South Korea <i>Asep Nur Rachman and Tae Woong Chung</i>	1499	ⓔ
A Study on Kappa Value in Taiwan Using Borehole and Surface Seismic Array <i>Tz-Shin Lai, Himanshu Mittal, Wei-An Chao, and Yih-Min Wu</i>	1509	
Ground-Motion Prediction Equations for Subduction Interface Earthquakes in Japan Using Site Class and Simple Geometric Attenuation Functions <i>John X. Zhao, Xuan Liang, Fei Jiang, Hao Xing, Min Zhu, Ruibin Hou, Yingbin Zhang, Xiaowen Lan, David A. Rhoades, Kojiro Irikura, Yoshimitsu Fukushima, and Paul G. Somerville</i>	1518	ⓔ
Ground-Motion Prediction Equations for Subduction Slab Earthquakes in Japan Using Site Class and Simple Geometric Attenuation Functions <i>John X. Zhao, Fei Jiang, Pan Shi, Hao Xing, Haifeng Huang, Ruibin Hou, Yingbin Zhang, Pengcheng Yu, Xiaowen Lan, David A. Rhoades, Paul G. Somerville, Kojiro Irikura, and Yoshimitsu Fukushima</i>	1535	ⓔ
Ground-Motion Prediction Equations for Shallow Crustal and Upper-Mantle Earthquakes in Japan Using Site Class and Simple Geometric Attenuation Functions <i>John X. Zhao, Shuanglin Zhou, Jun Zhou, Chen Zhao, Heng Zhang, Yingbin Zhang, Pingjun Gao, Xiaowen Lan, David Rhoades, Yoshimitsu Fukushima, Paul G. Somerville, and Kojiro Irikura</i>	1552	ⓔ
Ground-Motion Forecasting Using a Reference Station and Complex Site-Response Functions Accounting for the Shallow Geology <i>Marco Pilz and Stefano Parolai</i>	1570	
Distance and Azimuthal Dependence of Ground-Motion Variability for Unilateral Strike-Slip Ruptures <i>Jagdish Chandra Vyas, Paul Martin Mai, and Martin Galis</i>	1584	ⓔ
Ground-Motion Prediction Equations for Central and Eastern North America <i>Vladimir Graizer</i>	1600	
Spectral Scaling and Seismic Efficiency for Earthquakes in Northeast India <i>Simanchal Padhy and N. Subhadra</i>	1613	
Modeling of Interfacial Dynamic Slip Pulses with Slip-Weakening Friction <i>Shiro Hirano and Teruo Yamashita</i>	1628	
Source Spectra of the First Four Source Physics Experiments (SPE) Explosions from the Frequency-Domain Moment Tensor Inversion <i>Xiaoning Yang</i>	1637	
Source-Scaling Relations of Interface Subduction Earthquakes for Strong Ground Motion and Tsunami Simulation <i>A. A. Skarlatoudis, P. G. Somerville, and H. K. Thio</i>	1652	
A Mechanism Causing <i>b</i> -Value Anomalies Prior to a Mainshock <i>Jeen-Hwa Wang</i>	1663	
Relationship between Intensity and Recorded Ground-Motion and Spectral Parameters for the Himalayan Region <i>Anbazhagan Panjamani, Ketan Bajaj, Sayed S. R. Moustafa, and Nassir S. N. Al-Arifi</i>	1672	
Comparisons between V_{S30} and Spectral Response for 30 Sites in Newcastle, Australia, from Collocated Seismic Cone Penetrometer, Active- and Passive-Source V_S Data <i>Theodora Volti, David Burbidge, Clive Collins, Michael Asten, Jack Odum, William Stephenson, Chris Harris Pascal, and Josef Holzschuh</i>	1690	

Empirical Quantification of the Impact of Nonlinear Soil Behavior on Site Response <i>Julie Régnier, H�lo�se Cadet, and Pierre-Yves Bard</i>	1710 �E
Joint Deconvolution of Building and Downhole Strong-Motion Recordings: Evidence for the Seismic Wavefield Being Radiated Back into the Shallow Geological Layers <i>Bojana Petrovic and Stefano Parolai</i>	1720
Influence of Peak Factors on Site Amplification from Random Vibration Theory Based Site-Response Analysis <i>Xiaoyue Wang and Ellen M. Rathje</i>	1733
Liquefaction Features Produced by the 2010–2011 Canterbury Earthquake Sequence in Southwest Christchurch, New Zealand, and Preliminary Assessment of Paleoliquefaction Features <i>P. Villamor, P. Almond, M. P. Tuttle, M. Giona-Bucci, R. M. Langridge, K. Clark, W. Ries, S. H. Bastin, A. Eger, M. Vandergoes, M. C. Quigley, P. Barker, F. Martin, and J. Howarth</i>	1747 �E
Earthquake Cycles in a Model of Interacting Fault Patches: Complex Behavior at Transition from Seismic to Aseismic Slip <i>Naoyuki Kato</i>	1772 �E
Updated Probabilistic Seismic-Hazard Values for Egypt <i>R. Sawires, J. A. Pel�ez, R. E. Fat-Helbary, and H. A. Ibrahim</i>	1788
Evidence for Truncated Exponential Probability Distribution of Earthquake Slip <i>Kiran K. S. Thingbaijam and P. Martin Mai</i>	1802 �E
A Comparison between the Forecast by the United States National Seismic Hazard Maps with Recent Ground-Motion Records <i>Sum Mak and Danijel Schorlemmer</i>	1817
Features of Earthquake Source Process Simulated by Vere-Jones’ Branching Crack Model <i>Jiancang Zhuang, Dun Wang, and Mitsuhiro Matsu’ura</i>	1832
Region-Specific Assessment, Adjustment, and Weighting of Ground-Motion Prediction Models: Application to the 2015 Swiss Seismic-Hazard Maps <i>Benjamin Edwards, Carlo Cauzzi, Laurentiu Danciu, and Donat F�h</i>	1840 �E
Sensitivity of Near-Fault PSHA Results to Input Variables Based on Information Theory <i>Azad Yazdani, Ahmad Nicknam, Seyed Nasrollah Eftekhari, and Ehsan Yousefi Dadras</i>	1858
Estimated Casualties in a Possible Great Earthquake along the Pacific Coast of Mexico <i>Max Wyss and F. Ramon Zu�iga</i>	1867
Earthquake Early Warning: ShakeAlert in the Pacific Northwest <i>J. Renate Hartog, Victor C. Kress, Stephen D. Malone, Paul Bodin, John E. Vidale, and Brendan W. Crowell</i>	1875 �E
Relating Transient Seismicity to Episodes of Deep Creep at Parkfield, California <i>Charles G. Sammis, Stewart W. Smith, Robert M. Nadeau, and Rachel Lippoldt</i>	1887
Short Notes	
Soil-Invariant Seismic Hazard and Disaggregation <i>Iunio Iervolino</i>	1900
Sediment Liquefaction: A Pore-Water Pressure Gradient Viewpoint <i>H. Benjamin Mason and Harry Yeh</i>	1908
