

Erratum to Evidence for Truncated Exponential Probability Distribution of Earthquake Slip

by Kiran K. S. Thingbaijam and Paul Martin Mai

The scaling relationship between maximum slip u_{\max} and average slip u_{avg} given by Thingbaijam and Mai (2016) in the caption of figure 9 contains a typographical error in the print version of the paper. The correct relationship is

$$\log_{10} u_{\max} = 0.95u_{\text{avg}} + 0.62, \sigma = 0.10. \quad (1)$$

The online version of the paper has the correct equation. We also note that the typographical error in Thingbaijam and Mai (2016) does not affect the discussions and conclusions previously presented in the paper.

Acknowledgment

We thank Ralph Archuleta for pointing out this error to us.
